Computer Networks Lab Ex no. 10

By Ayoosh G Iyer 24BAI1370

Comparison of routing protocol (AODV,DSDV,DSR OLSR) using ns3 and plotting the results

Same as ex 10 just set nodes (n_wifi = 100) sink nodes (`int m_nSinks{20};` =20) transmision power (`double m_txp{10} =10`) compared to the values 10 ,10 ,7.5 for all 3 respectively

1. Copy the manet-routing-compare.cc file from examples/routing to ns-3.43/scratch
2. Navigate to the ns-3 root directory
   cd ns-allinone-3.43/ns-3.43
3. Build the project
   ./ns3 build
4. Ensure no conflicting files (like sum.cc) are present in the scratch/ folder; delete them if necessary
5. Run the base simulation
   ./ns3 run scratch/manet-routing-compare
6. Run simulation for AODV protocol
   ./ns3 run "scratch/manet-routing-compare --CSVfileName=naodv.csv --protocol=AODV"
7. Run simulation for DSR protocol
   ./ns3 run "scratch/manet-routing-compare --CSVfileName=ndsr.csv --protocol=DSR"
8. Run simulation for DSDV protocol
   ./ns3 run "scratch/manet-routing-compare --CSVfileName=ndsdv.csv --protocol=DSDV"
9. Run simulation for OLSR protocol
   ./ns3 run "scratch/manet-routing-compare --CSVfileName=nolsr.csv --protocol=OLSR"

10. Convert CSV files to space-separated format

```
tr ',' ' ' < naodv.csv > naodv.dat
tr ',' ' ' < ndsr.csv > ndsr.dat
tr ',' ' ' < ndsdv.csv > ndsdv.dat
tr ',' ' ' < nolsr.csv > nolsr.dat
```

11. Create a gnuplot script file

```
nano plot.plot
```

12. Add the following content inside plot.plot

```
set terminal pdf

set output "compare.pdf"

set xlabel "Time(Sec)"

set ylabel "Receive Rate"

plot "naodv.csv" using 1:2 with points title "AODV" , "ndsdv.csv"
using 1:2 with points title "DSDV", "ndsr.csv" using 1:2 with
points title "DSR","nolsr.csv" using 1:2 with points title "OLSR"

set xlabel "Time(Sec)"

set ylabel "Packets Received"

plot "naodv.csv" using 1:3 with line title "AODV" , "ndsdv.csv"
using 1:3 with line title "DSDV", "ndsr.csv" using 1:3 with line
title "DSR","nolsr.csv" using 1:3 with line title "OLSR"
```

13. Save and exit the editor
14. Run gnuplot from terminal

```
gnuplot plot.plot
```

15. Open the generated output file

```
compare.pdf
```

naodv.csv
~/ns3/ns-allinone-3.43/ns-3.43
